

Future Innovators Summer Camp Is Back!

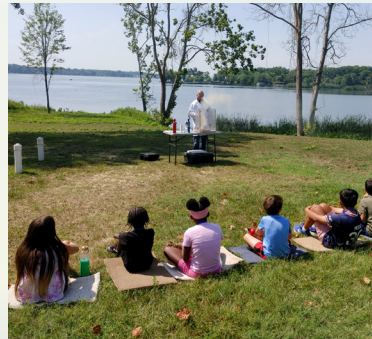

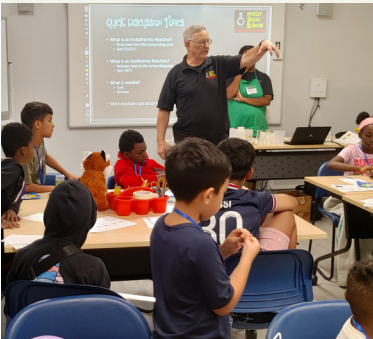

This summer, curiosity takes the lead!

Our hands-on STEM Summer Camp is packed with exciting challenges, creative problem-solving, and real-world exploration designed for elementary students.

From coding and robotics to space science and environmental innovation, campers will dive into themed adventures that make learning feel like play. Grades incoming 1-5 are welcome to attend.

Curriculum will include such topics as:

- Coding, technology, and engineering
- Exploration and discovery
- Environment and sustainability
- Mystery and problem solving

New Friendships
